Dear Sir-

To Whom it May Concern.

Please consider the contents of my communication, it may be of some value.

This regards the numerous anonymous phone calls by Crack-Pots in various parts of the country. Here is a idea if 'he phone Companys' would consider would be a great discouragement to make calls. Electronics devices, such as a miniture tape recorder could be installed in each public phone, to inform the party being called, of the telephone no. of the phone used by the caller.

This miniture tape would tell the listener what the phone no. is, just as the receiver is taken off the hook. It would repeat the no. perhaps twice just as soon as the coin was dropped. Thereby the listener being subjected to the call from a crack pot would write down the no. from which the call came. The telephone Companys perhaps would regard this as too expensive etc. yet it would greatly discourage calls by crack pots. using public phones.

I had a brother who was a electronic engineer working out of the pentagon during the last War. He has later passed on.

Also I have a friend who is a electronic engineer in Portland Ore. He was sent from the states to repair the trigger michanizm on the plan which dropped the first atom Bomb.

I have not consulted him regarding this yet.

Also the big question is why did the assassin decide to shoot J. F. Kennedy. I think, (just a thought) that he may have seen the movie acted by Frank Sinatra, in which Sinatra played the part of a assassin to shoot a president. (From a upstairs Window.) This picture should not have been allowed to be shown. I saw this picture in 1955. Had Kennedys assassin seen this, it may have been where he got the idea.

I do not beleive the assassin had any originality of his own. A mind of his type doesn't usually have capabilities of originating.

Just a thought may be of help.

The picture theatres in Dallas or Fort Worth may have had this picture on their screens.

Sincerely  
R. V. Torgerson

P.S. Even to go a bit farther. Miniature cameras could be installed in public phones. The caller would not be aware of Sounds ridiculous perhaps but in View of all the crime and criminals running rampant in America. Steps will have to be taken to reduce crime to a minimum it can be done.

Also. I solved a bicycle theft when I was but 16 yrs of age. I located the culprits and had the stolen bicycle returned to my friend before the day was up and the bicycle was found in a hidden place many miles from when it was taken from a padlock. Can any F. B. I. man top this. Just thought it would interest your dept.

Thank you again.

2nd P.S. I have a cousin who is a F. B. I man was wounded in a bank holdup.

Dear Sir —

To whom it may concern.  
Please consider the contents  
of my communication, if may  
be of some value.

This regards the numerous  
anonymous phone calls by Crook-  
Pete in various parts of the country.  
Here is a idea if the phone company  
would consider would be a great  
discouragement to make calls.

Electronic devices, such as a  
miniature tape recorder could be  
installed in each public phone, to  
inform the party being called, of the  
telephone no. of the phone used by  
the caller.

This miniature tape would tell the  
listener what the phone no. is, just as  
the receiver is taken off the hook.  
It would repeat the no. perhaps twice.  
Just as soon as the coin was inserted.

CORRESPONDENCE

think the listener being subjected to the call from a crackpot would write down the no. from which the call came. The telephone company perhaps would regard this as too expensive etc. yet it would greatly discourage calls by crackpots using public phones.

I had a brother who was an electronic engineer working out of the Pentagon during the last war. He has later passed on.

Also I have a friend who is an electronic engineer in Portland Ore. He was sent from the states to repair the trigger mechanism on the plane which dropped the first atom bomb. I have not consulted him regarding this yet.

Also the big question is why did the assassin decide to shoot J. F. Kennedy. I think (just a thought) that he
