Dear Sir,

President John F. Kennedy

I may be in a wheelchair. I may not be able to walk, but I can observe, think, and write. On television I saw the assassin come out of a building carrying something big wrapped in paper. (Maybe I heard it on the radio) A policeman said to him, "What do you have wrapped up in there?" The man said, "Window Shades." Somebody in the building said, "He works here. The policeman was satisfied and walked away. Why was he so easily convinced? Was he in on the game? Why didn't he examine the package closely, like opening it? Then he would have discovered the gun.

The whole mess to me does not look too kosher. What do you think you can do about it? To me, it bears strong investigation.

Very Sincerely

Mrs. Devra Henry

P.S. This is about our late, beloved, President Kennedy.

and evaluated anyway.

Why was he so easily convinced was he in on the game? Why didn't he examine the package closely before opening it? If he would have discovered the gun.

The whole mess to me does not look too peculiar.

What do you
