Sir: During the period of greatest influence of Catholic Joe McCarthy and the hysterical anti-communist crusade manufactured by the Vatican to create internal dissension and thereby secure political control of the United States, the sacrosanct Federal Bureau of Investigation under infallible Saint J Edgar Hoover accommodatingly put paid informers (such as Harvey Matusow and Elizabeth Bentley) on the FBI payroll solely to provide perjured testimony behind drawn curtains to insure its "convictions" of so-called "communists". Only after this FBI conspiracy against the public interest was exposed did Saint J Edgar Hoover's minions desist from this despicable practice over many obviously false protestations of innocence; which protestations implied an unbelievable gullibility equally discreditable.

More recent developments of Saint J Edgar Hoover's duplicity involving manufactured false evidence and wilful destruction or withholding of contrary documented evidence on the part of Federal Bureau of Investigation agents and "experts", long since come to light in the independent investigations of the Warren Commission Report on the assassination of President John F. Kennedy. But instead of facing up to their error now revealed by incontrovertible photographic evidence, these same FBI agents and so-called "experts" - under solemn oath in a court of law to tell "the truth" - can only resort to DELIBERATE LYING and EQUIVOCATION from the witness stand to preserve the FBI's mythological reputation for integrity, omnipotence and infallibility. Whenever the occasion warrants, OFFICIAL PERJURY now appears an established political practice of Saint J. Edgar Hoover's sacrosanct FBI.

- In the face of photographic evidence the FBI ignored or deliberately "doctored" in the Warren Commission Report, and which deliberately doctored "evidence" the nation's accommodating Fourth Estate so obligingly swallowed under FBI direction and attempted to foist on a gullible public; the FBI's "expert", a Robert A Frazier, still continues to DELIBERATELY LIE under oath from the witness stand - obviously at Saint J Edgar Hoover's direction - seeking to deny the incontrovertible photographic evidence of highpowered rifle shots from a point in front of President Kennedy's position in the cavalcade. A more obvious red herring was never invented than this so-called "expert's" devious "explanation

from the witness stand on that day the nation commemorated the birth of its first president who reputedly "never told a lie". Obviously our sacrosanct FBI and its stable of lying "experts" when cornered do not have the same degree of common decency and integrity possessed by the founders of our nation. With the stench of this flagrant duplicity at the most exalted levels of government still fresh in our nostrils, is it any wonder public confidence in all police departments and activities is at such a low ebb???

To further compound this governmental conspiracy against the public interest, the Nixon Department of So-called Justice of the United States has refused to permit release of documented evidence in the nation's archives to throw light on the assassination of a president; obviously under pressures from Saint J Edgar Hoover in His Divine Right not to be questioned by mere mortals as to the infallibility of the FBI or its agents, even when ordered by a federal court to do so, and has resorted to an appeal to prevent this evidence from becoming public. What is it our high government officials seek to hide???

With such compelling evidence of complete contempt for the law and the courts at the highest levels of our government today, is it any wonder the nation's distrust of its own government has now reached such proportions as to threaten the future of that government as now constituted???

During the period of greatest influence of Senator Joe McCarthy and his hysterical anti-communist smear manufactured by the FBI to create internal dissension and thereby ensure political control of the United States, the enormous power of the Bureau of Investigation under infallible Saint J Edgar Hoover accordingly put paid informants (such as Harvey Lowman and Wm. Frank Bentley) on the FBI payroll openly to provide perjured testimony before Congress to insure its "confidence" of so-called "communists". Only after this FBI conspiracy gained the will to impeach was exposed did Saint J Edgar Hoover's dubious tactics for this obviously非法 practice over many obviously false protestations of innocence; which protestations implied an unbreakable infallibility equally discreditable.

More recent developments of Saint J Edgar Hoover's drably involving manufactured false evidence and willful destruction or withholding of contrain documented evidence on the part of Federal Bureau of Investigation agents and "agents", long since exposed to light in the independent investigations of the Warren Commission Report on the assassination of President John F Kennedy, but instead of facing up to their own now revealed by incontrovertible photographic evidence, those same FBI agents and so-called "agents" - under oaths each in a court of law to tell "the truth" - openly report to MILITARY LIES and MAUVESCAJUS from the witness stand to promote the FBI's mythical reputation for infallibility, uniqueness and infallibility. However this occasion however, OFFICIAL SUBJECT now exposes an established political practice of Saint J Edgar Hoover's enormous FBI.

In the face of photographic evidence the FBI ignored or deliberately "dictated" to the Warren Commission Report, and which apparently destroyed evidence the nation's corroborating fourth estate so callously exhibited under FBI direction and attempted to sell on a gullible public; the FBI's "expert", a Robert A. Frazier, still continues to FLAUNTLY LIE under oath from the witness stand - obviously at Saint J Edgar Hoover's direction - failing to deny the incontrovertible photographic evidence of his powdered rifle shot fired a point in front of President Kennedy's position in the grille car. An obvious red herring was never invented than this one lied fabrication of various "explanations" from the witness stand on that day the nation exhumed the birth of its first president who reportedly "never told a lie". Obviously our credulous FBI and its class of lying "experts" does not have the same degree of common decency and integrity possessed by the founders of our nation. With the stand of this flagrant duplicity at the most exalted levels of government still fresh in our minds, is it any wonder public confidence in all police departments and institutions is at such a low ebb???

To further compound this governmental conspiracy against the will of the people, the Department of General Justice of the United States has refused to permit release of documented evidence in this nation's archives to throw light on the assassination of our President; obviously under pressures from Saint J Edgar Hoover in his living room, not to be questioned by now regarding as to the infallibility of the FBI or its agents, even when ordered by a federal court to do so, and has reported to Congress to prevent this evidence from becoming public. Whether at the high government official level or the low level with such compelling evidence of complete contempt for the law and the courts at the highest levels of our government today, is it any wonder the nation's distrust of its own government has now reached such proportions as to threaten the future of the government as now constituted ??
