Dear Mr. Lesar:

This is in reply to your letter of January 29th, addressed to Mr. Laurence Silberman of the Department of Justice, and thereafter referred to me and received on February 19th.

I wish to state in response to your inquiry that FBI records contain no information to indicate your client, Mr. Weisberg, has been the subject of FBI surveillance. These records further do not disclose any reference to dissemination by us of information concerning him or his criticism of the Warren Commission along the lines you indicated in your letter.

With regard to your request for response to letters directed by Mr. Weisberg to former Attorney General Mitchell, our records reveal a copy of a letter dated March 12, 1971, had been referred to us, it having been acknowledged by the then Assistant Attorney General W.H. Wilson under date of March 23, 1971. The charges contained in the letter were general in nature and made no specific allegations, and there is no record of further action being taken.

In a second letter, located in files of the Department of Justice under date of March 22, 1971, Mr. Weisberg alleged in non-specific terms that he had suspicions of being "tailed" in Penn Station, New York. FBI records contain no reference to this letter.
