Mrs. Harold E. Westfall

Mrs. Westfall called regarding the current investigation into the assassination of President Kennedy. She feels that this investigation is in order and wishes to go on record as feeling that it should be very thoroughly gone into.

She read to me from a news item dated 11/22/73 - which was the tenth anniversary of the assassination - this from the Star Free Press. The story was by-lined by Bob Holt and stated that at 10:05 on the 22 Nov. 63 a telephone call came in to the General Telephone office in Oxnard from a soft voiced woman who stated that the President would be killed at 10:10 that day. The operator could hardly understand her and called the supervisor to listen to the conversation. The information was repeated to the supervisor and the caller hung up. At 10:10 she called again and said that she was incorrect - that the assassination would be at 10:30. After the news was spread that the President had been shot, the operators remembered that the call had come in and that the time of 10:30 was 12:30 Dallas time, when the President was shot. This was reported to the FBI at the time, but nothing was heard of this at any time later.

Mrs. Westfall thinks that this might bear out the possibility of something more than one man being responsible for the shooting.
