SUBJECT: JOHN F. KENNEDY
ASSASSINATION MATTER

Re J. B. Adams memorandum to Mr. Callahan, dated 9/10/75, in captioned matter.

A review of the alleged teletype of 11/17/63 was conducted and the following are the observations resulting therefrom.

This alleged teletype does not appear to have authenticity because it is not logical in its content. First of all, this teletype did not request contact of security informants which would be a basic and logical thing to do. Also, it is inconsistent to instruct the field to contact all criminal informants and only logical racial and hate group informants. In addition, the instructions "Bureau should be kept advised of all developments" does not appear to be an instruction that would emanate from FBI Headquarters. In such a matter as involving a threat to a president, the instructions would be along the lines of immediately advising the Bureau if not telephonically. In view of the above it is felt that these glaring discrepancies would indicate that this was not a genuine FBI teletype.

Efforts are being conducted to locate comparable documents in the same time frame in order to obtain the language normally utilized.

ACTION:

None. For information.
