

June 19, 1959

Commission Exhibit No. 234

Dear Sir,

Enclosed please find the registration fee of twenty-five dollars which I understand is to be placed toward my normal college fees and expenses. I am very glad to have been accepted for the third term of your college next year and am looking forward to a fine stay. Any new requirements on the school or even the student who will attend next year would be appreciated.

Sincerely,
 [Signature]

Commission Exhibit No. 235

July 10, 1959

Mr. Lee H. Oswald
ECAF, MACS-9
Santa Anna, California
U.S.A.

Dear Mr. Oswald,

Thank you for your letter of June 19th with the enclosed deposit of \$25.00 for the third term of the Year Course 1959-60 at Albert Schweitzer College.

Enclosed please find a list of things we suggest our students to bring along. It may be helpful to you when you prepare for your stay in Switzerland.

Should any more questions come up during the course of the next months, please do not hesitate to write again.

Looking forward to having you as one of our future students, we are,

Sincerely yours,

E. Weibel, Secretary

ALBERT SCHWEITZER COLLEGE
CHURWALDEN (GR)
SWITZERLAND

September 3rd, 1960

Commission Exhibit No. 236

Mrs. Marguerite Oswald
1410 Hurley
Ft. Worth, Texas, USA

Dear Mrs. Oswald,

Thank you for your letter of June. As yet we have had no word whatever from your son Lee.

The date of his application was March 4th, 1959, and he applied for attendance of the third term at ASC, from April 20th till July 2nd.

We regret that we shall not be able to refund the deposit of \$25.00. You will well understand that in a small College such as ours, where we can accept only a limited number, the fact that a student does not appear at the beginning of the term means a distinct loss. The \$25.00 at least cover our administrative expenses.

We hope that by now you have heard from your son, for we can certainly understand your concern about him.

Sincerely yours,

ALBERT SCHWEITZER
COLLEGE

April 26, 1960

Mrs. M. Oswald
1410 Hurley
Ft. Worth, Texas USA

Dear Mrs. Oswald,

Thank you for your letter of April 6th. It is with regret that we have to tell you that we have not had any word from your son Lee since his application for the 3rd term of a few months ago. We fully expected him to be here for the beginning of the trimester, April 19th, especially since he had paid the deposit.

We fully share your concern and hope that you will hear from him in the very near future. If you do, we would appreciate a short note from you indicating the reasons why he did not come to ASC, unless, of course, we hear from him personally.

Sincerely yours,

Prof. Hans Casparis
President

Prof Hans Cooper:

Dear Sir:

I am writing you in regards to my son Lee. A few months ago he wrote me that he was accepted by your college and also had sent a registration fee. He remarked he was quite happy and looked forward to going there. He left for Moscow, Russia in November and I have had only one letter from him. My mail to him is being returned. Please let me know if you think had any further word from him.

Sincerely

Mr. Marguerite Oswald

EVERY MARINE may be proud of the reputation the Marine Corps has established and maintained over the past fifty years as a Corps of outstanding marksmen. Now, you have the opportunity to uphold this splendid tradition. This score book will aid you in the accomplishment of your mission.

LEMUEL C SHEPHERD, Lt.

General, U. S. Marine Corps

Commandant of the Marine Corps

PURPOSE OF SCORE BOOK

The score book is prepared in such form that the shooter can accurately record windage and elevation used, what he should have used, and the results of his firing.

INSTRUCTIONS:

(a) CALLING THE SHOT.—After each shot, the shooter places a dot in the column headed "call," indicating where he thinks the shot has hit.

(b) SHOT PLOTTING, SLOW FIRE.—After the target is marked and diced, the spot of the impact is indicated on the ranging target by writing in the number of the shot (see page 6). The score for each shot can be entered at the completion of the entire string.

(1)

(c) **SHOT PLOTTING, RAPID FIRE.**—After the target is marked and disced, a dot or an X should be placed on the recording target for each 5, 6, 8, or 2, locating them as indicated by the spotter in the target (see page 7).

(d) If necessary to change windage or elevation the shooter will refer to the windage and elevation lines on his recording target, making the adjustments accordingly.

(e) The shooter will do all of his own recording.

(f) After the shooter has established a correct sight setting at all ranges for the phases of firing concerned, he will fill out the rifle recording sheet.

(2)

EFFECT OF WIND

The effect of wind must be carefully studied. The direction of wind is explained by the use of the word "o'clock" and the velocity of the wind is described in miles per hour. The horizontal clock system is used in describing the direction of the wind. The firing point is considered in the center of a big clock face with the 12 towards the target. The arrows on the diagram indicate 3, 6, 9, and 12 o'clock winds. A 3 o'clock wind comes directly from the right. A 6 o'clock wind comes straight from the rear. A 9 o'clock wind comes directly from the left.

SCORE 42

SAMPLE SCORE SHEET

U. S. RIFLE CALIBER .30 M1

ELEVATION RULE.—One click of the elevating knob moves the strike of the bullet 1 inch on the target for each 100 yards of range. The strike of the bullet is moved up or down as shown by the arrow and words on the knob.

WIND-GAGE RULE.—One click of the windage knob moves the strike of the bullet 1 inch on the target for each 100 yards of range. Right windage moves the strike of the bullet to the right and left windage moves it to the left, as shown by the arrows and letters on the windage knob.

ONE-CLICK WINDAGE RULE.—The range (expressed in hundreds of yards) multiplied by the velocity of the wind and divided by 10 equals the number of clicks to be allowed for a 3 or 9 o'clock wind. (For a 1, 5, 7 or 11 o'clock wind, use approximately one half of the windage given by the formula; for a 2, 4,

—

(M)

8, or 10 o'clock wind, use approximately the same windage given by the formula.)

Example: At 500 yards, if the wind is blowing 8 miles per hour at 3 o'clock, 5 X 8 equals 4 clicks of windage. Since the wind is coming from the right, the rear sight is moved to the right, into the wind, to counteract the force of the wind. Therefore, the sight should have 4 clicks of right windage for the first shot.

ZERO OF RIFLE.—The zero of a rifle for each range is the point at which the rear sight must be set for both elevation and windage in order to hit the center of the bull's-eye on a normal day when there is no wind. This zero may not conform to the marks on the elevating knob and the windage gage. The zero of any one rifle may differ with different men, owing to the difference in their way of holding the rifle or of aiming.

Commission Exhibit 229

U. S. CARBINE CALIBER .30 M1

Equipped with the sight, adjustable, rear assembly
D71955 or D716006

ELEVATION DIRECTIVE.—The aperture slide seated in longitudinal guideways in the ramp can be manually moved forward or backward in the ramp as more or less elevation is needed. As the ramp slopes forward, the peephole will be lowered when the slide is moved forward, and raised when moved to the rear. Thus the aperture is raised or lowered for increase or decrease of range setting.

Four sight settings are available. These notches correspond to range settings of 100, 200, 250, and 300 yards, as indicated on the top faces of the ramp wings. A setting for 150 yards is the same as that for the 100 yard setting.

WIND-CAGE RULE.—One click of the windage knob moves the strike of the bullet one inch on the target for each 100 yards of

range. Right windage moves the strike of the bullet to the right and left windage moves it to the left. At 100 yards, one click moves the bullet strike on the target 1 inch; at 200 yards, 2 inches; and at 300 yards, 3 inches.

ONE-CLICK WINDAGE RULE (approximate only).—The range (expressed in hundreds of yards) multiplied by the velocity of the wind and divided by k , equals the number of clicks to allow for a 3 or 9 o'clock wind. (For a 1, 5, 7, or 11 o'clock wind, use approximately one half of the windage given by the formula; for a 2, 4, 8, or 10 o'clock, use approximately the same windage given by the formula.

Example: At 300 yards the wind is blowing 10 miles per hour from 3 o'clock. $3 \times 10 = 30$ equals 6 clicks of windage. The clicks should be set for 6 clicks right windage for the first shot.

"MY RIFLE"

The creed of a United States Marine

by

Major General W. H. Rupertus, USMC

This is my rifle. There are many like it, but this one is mine.

My rifle is my best friend. It is my life. I must master it as I must master my life.

My rifle, without me is useless. Without my rifle, I am useless. I must fire my rifle true. I must shoot straighter than my enemy who is trying to kill me. I must shoot him before he shoots me. I will . . .

My rifle and myself know that what counts in this war is not
the rounds we fire, the noise of our burst, nor the smoke we make.
We know that it is the hits that count. We will hit.

My rifle is human, even as I, because it is my life. Thus, I will
learn it as a brother. I will learn its weaknesses, its strength,
its parts, its accessories, its sights, and its barrel. I will ever
guard it against the ravages of weather and damage. I will keep
my rifle clean and ready, even as I am clean and ready. We will
become part of each other. We will . . .

Before God I swear this creed. My rifle and myself are the
defenders of my country. We are the masters of our enemy. We
are the saviors of my life.

So be it, until victory is America's and there is no enemy, but
