

To Quin Shea from Harold Weisberg, JFK assassination records appeals 6/30/79
Dallas and New Orleans records
Illegible copies
Oswald and IRS records

While the volume of Dallas (100-10461) bulkys to which this relates is not identified in the copy provided to me it appears to be 1B15, Part 1, Section 3, from the additions to the cover I believe were added here.

A copy of the list of records was sent to New Orleans, where it is 100-16601-1A28, Volume 2.

While notations were added to the Dallas copy, otherwise the two lists are identical.

Some of the copies that are of interest to me are illegible. In part this appears to come from the use of photographic copies rather than the original for the initial xeroxing and then from re-xeroxing. Other problems can be attributed to reductions. ^{SIZ}

Part of this appeal is for legible copies.

#188 (in an earlier volume) is described as "Pass dated 5/58 in name Sgt. Oswald Zebra Co., Open Mess." On the Dallas copy there is a ? at Sgt., which is natural, considering that Lee Harvey is not an Oswald who from the available records was a surgeant. Open mess is had corrected to "NCO" on the Dallas copy.

#205 is only "DELETED." This does not mean skipped and there is no claim to any exemption. There also is no description. (Also earlier volume.)

#274 is "Letter by Lee H. Oswald to Federal Income Tax." It is completely illegible.

Oswald's income tax forms are withheld, which is normal. However, with his death so long ago and I believe with other tax returns being disclosed, I appeal the withholding of his tax returns, in part because there is no dependable accounting of his income, which the Commission conjectured about, and in part because any unaccounted income, no matter how slight, could be of considerable importance.

#s 337 and 338 are some of Oswald's anti-Communist political writings. I would like to have them for archival purposes and to be able to read copies that are as legible as possible. Xeroxes made from clear copies will be legible.
