

JFK - Union

Mr. Thomas H. Bresson, chief  
FOIEA Branch  
FBI  
Washington, D.C. 20535

2/8/81

Dear Mr. Bresson,

Many of the records provided under discovery in C.A. 75-226, with your letter of 1/30/81, do have have Central Records file identifications on them. Among these is the 6/11/79 Clark to Herndon (JWK:bld?) memo titled after the HSCA. (This is a very unclear copy.)

I am not certain that this record is complete. I know that the copy provided does not have the three enclosures indicated.

I would appreciate a clear and complete copy, with the attachments.

Do any records hold any other weights for the various specimens? For example, were they weighed more recently? Weight on <sup>receipt</sup> ~~manuscript~~ is given.

It is stated that the samples removed for spectrographic analysis were not weighed. The weight at the time samples were taken for NAA is known. Do these two sets of weight not permit calculation of what was removed for ~~XXXX~~ spectrographic analysis?

Did HSCA provide the FBI with copies of the weights it recorded? If so I would appreciate a copy.

Sincerely,

Harold Weisberg
