

Dear Jim,

1/22/85

I'm sending Lynch a copy of my enclosed response to Huff on the chance it may be of interest or use to him. They may have tried to pull the same first-in, first-out lie in one or more of his cases.

I'm surprised at the openness of their solicitation of more lawsuits, more because they pick such ancient and thoroughly documented matters to solicit over.

Makes one wonder if they are seeking additional emasculating precedents.

A friend took me to the mall for an hour and a half of w/faking therapy and although I felt somewhat better while at it, back home I'm just as pooped. Her car has a superb heater and was well warmed before she got here.

I hope to be able to make it in my own tomorrow. Depends on the temperature and windchill. Old Faithful has started easily every day. I've got it running right now to loosen the lubricants and restore the battery. Also an old one!

Oddly, seems like the new cars, particularly imports, wouldn't start around here yesterday.

Nothing in today's mail.

Best,

1/23,

The efforts of which you are aware, perhaps the associated tensions, the rushing and most of all probably the weather, keep me worn out and very weary. I feel not only that I can't but that I ought not try to do much. Maybe the antibiotic also dragged me down. I did go to the mall at the usual early hour today, made out OK and felt better while walking, but not now, after only bringing in a cart of wood and sitting and chatting with an old friend from Senate committee days, who phoned. But I'm back in my office and I'm going to add to the letter to Huff referred to above.

Meanwhile, I need a few things I hope you will find time for promptly, preferrably xeroxes but if not citations. Please do this as soon as you can, from the 0322 case record. And so you will not be concerned about the reason, it has nothing to do with any court filing. But I do want the copies to reflect the fact that they were filed in district court. Not much and I think and hope you can do this without it taking much time. I need the blank Hosty search slip and probably from the same affidavit the citations to his report that LHO beat "arina up and the attached pages of his WC testimony, no reason to believe he'd be violent. From Phillips' declarations, only two things and if no trouble, a third. The two are his attestation that they have no records on "critics" and they never had the police tapes. The third, which I'd like but do not need as much, is his attestation that Bresson decided what to give me instead of Dallas making a search. Digging these things out would just be too much for me now. Please believe me, this is important to me, and if you want to know more, I'll tell you.

From your failure to do as simple a thing as looking at a phone book for me I take it you are paying no attention to anything I ask. But please do what I now as as soon as you can. And if you do not intend to, please let me know immediately because then I'll have to.

Dear Tom, Typing under adverse conditions in the living room, as my ltr to Huff says, was too much, my leg got sore swollen & I'm ~~still~~ tired. I also had a scare/chose shove: a door to the store started to come off in my (glazed) hands! I was able to rehang it, but I don't take these kinds of things as I once did! His letter to me does not indicate that Hubbel wrote it for him does your copy? I'd like to know if she is so wretched a person because she ~~does~~ does know better.

In writing you earlier I suggested that you'd have use for this on 1996 fee & alleged voluntary compliance. I warned him of this in the very letter he cites & you have, yet he stonewalls on everything & lies even after being alerted to what he is doing; his own department's argument. The 25 request & appeals still ignored after the DOJ promise to the Senate may be a fortunate coincidence because I testified to that in 1996 and my appeal included a copy of what we gave Civil Div. in that case & at that time (via John Dugan). So on alleged voluntary compliance & before Judge Jones given you have that old business still ignored a decade later.

It has been kind of rough because I did not ~~deliberate~~ anticipate that it would get this cold with so severe a windchill and just going out to start the car (which chid!) this afternoon was so much too much I asked Lili to turn it off after it had run for a while. A, I'm reluctant out to start the oil burner after ~~so long~~ so long a period in which it wasn't used.

I do not ~~deliberate~~ use my car when it is this cold because the heater can't be made to work well enough so I'm further debilitated by only one day of walking therapy in the past six and may not drive tomorrow even in a heated car if there is still a strong wind. And that will tire me still more! I'm uneasy ~~about~~ about the whole ~~business~~ business. I ~~did~~ didn't even ~~it~~ suffer last night & for me that is unusual!

got a strange but nice letter from Scotland today & will send a copy. So far as I know, my en banc petition was not rejected out of hand because I've heard nothing. But that's only hand. There remains foot. And mouth!

If I did not explain, I'd be had to close off Lili's office & mine to keep it tolerably safe for us and I find the fire several ~~times~~ times a night. When I do I listen to out-of-town all-news stations, and what I hear from Chicago indicates a break in the weather. ours usually comes that way this time of the year. Compared with the night before, their temperature was up about 20°.

Robert Groden was here ~~some~~ day with his four kids. We are the godparents of the oldest, a very pleas my kid, 6th grade in school. Because of time & cost I'd settle for a motion picture copy of the Zapruder film with the marginal material. Robert's kid had a copy, just possibly have the marginal material but not how it can now be copied to include it - Presb HW 1/21/85
