

King assassination records appeals
Claude and Leon Powell
- Abstracts
GND Records

Harold Weisberg 5/2/80

The abstract for 6111 does not withhold the Powell names, which are withheld in
the underlying record. They also are withheld in earlier abstracts.

The social reports an FBI-GND conference about what to do about the Powell
allegations. I do not recall receiving any such records from GND.

When the FBI withhold names it also has disclosed and you do not act on appeals
the result will be confusion in the historical records.

The high ranking of this irrelevancy by the HSCA makes it more significant.
