

affairs - Markim Bulkies

Dear Jim,

7/9/68

This is another old letter of some importance that I ask you to pass along to Bill Cole, my appeals to Shea having had no response.

That it is an old letter is reflected in Shea's report dated 10/26/70. On page 12 he states that I received 100+ pages of the 5000+ pages of the PHINA MURKIN bulks, that I would receive a replacement page and that (page 13) "if Mr. Weisberg now desires copies of all of the laboratory materials as they exist in the Reading Room, they will be made available to him without cost."

I did ask for those pages and I did not receive them.

After reviewing records that reminded me of this I wrote him again on the 6th (copy attached), explained that I regarded them as presently of some importance, and asked that he phone me to let me know if I would now get those pages and if so when I might expect them.

I have not heard from him.

At the bottom I have marked a note to myself.

Sincerely,
