**FLOOR PLAN OF ASSASSIN'S HIDEOUT**

President Kennedy's assassin worked from an almost perfect "blind" on the sixth floor of the Texas School Book Depository. He fired from behind a row of stacked cartons which hid his presence (upper left). His rifle was found hidden behind other cartons (bottom right) at a stair well which police believe he used as an escape route. The shots were fired from the Elm Street windows at the top of the drawing.
