

Further correction

Dear Editor:

(1/26/65)
In my comments in last week's issue (January 19) pertaining to Dr. Josiah Thompson's views of the "#5 man" in the Moorman photo, I noted a number of factors that would tend to invalidate Miss Sitzman's belief, as attributed to her by Dr. Thompson, that "... no one was in that area."

Among the factors noted, I stated the following:

However, even if—contrary to the actual fact—she HAD been facing in the direction of the #5 man at the instant of the Moorman photo, she would not have been able to see him; for he was hidden from her view by the westerly concrete "shelter" section of the pergola structure.

This is incorrect. If, at the instant the Mary Moorman photo was taken, Miss Sitzman HAD been facing directly behind her, instead of toward the motorcade as this and other photos prove she was actually doing, the "shelter" would not in fact have blocked her view, and she could have seen the #5 man.
