Dear Mr. Marcus,

From my observation of the two photographs shown to me today, I can state without question, that the two angles of the subject are from the same person.

That, from the movement that has occurred between the two different exposures, the subject is a man holding an elongated object.

I have been a commercial photographer for the past 20 years and have had experience in connection with photography work for War Crime Investigation Team for the U.S. Army

Sincerely yours,

*Jacques de Langre*
