Ruby Asks World to Believe He Alone Murdered Oswald

DALLAS (AP) Jack Ruby appeared to the world Monday to believe that he alone was responsible for the murder of Lee Harvey Oswald.

Intimates said Ruby, doomed by incurable cancer, is obsessed with the desire to make it fully and finally clear, before he dies, that the shooting of the man named as President John F. Kennedy's assassin was not the result of a conspiracy.

Said Ruby's brother, Earl, a Detroit businessman:

"Jack has told me a dozen times or more he prays to be given a final lie detector test so people will be convinced that there was no plan on his part, or conspiracy of any kind, to kill Oswald. It is his last wish."

Condition Remains Serious

Ruby remained in serious condition Monday in his room at Parkland Hospital. His cancer is widespread and inoperable. Doctors have declined to estimate how long he may live.

Elmer Gertz, a Chicago lawyer on the legal team which won a reversal of Ruby's conviction of the Oswald murder, talked with the 55-year-old former night club operator Sunday. Jack reads the newspapers and magazines and watches television and is aware of the controversy about the Warren Report and all the books and articles which are constructing incredible stories of a conspiracy in which he is claimed to have had a part," Gertz said.

He says, "How can they think I

hiding anything, or
ecting anyone else,
is nothing to hide; there
was no one else."

Gertz added that Ruby has insisted over and over that he had no way of knowing Oswald was being removed from the Police and Courts Building at that time.

Only four minutes before, Ruby had sent a money order from a nearby Western Union office.

"He is bewildered that it is not plain to everyone that it was a million-in-one chance that he would stumble into a situation in which it was even possible that Oswald could be shot," Gertz said.

Gertz said there was nothing suspicious about the fact that Ruby had a gun when he encountered Oswald and a police escort in the building basement that Sunday morning, Nov. 24, 1963.

"Jack always carried a gun, for he sometimes had large sums of money," said Gertz. "That morning he had \$2,200 in cash."

Gertz conceded that a further lie detector test of Ruby's story might be scientifically inconclusive. Ruby underwent seven hours of such testing by Warren Commission investigators.

"The assessment of his answers has never been made because results, particularly in a case involving a man of Ruby's emotional and disturbed condition, are not considered reliable," Gertz said.

"The point is that Ruby is so desperate to have people believe he is telling the truth, he is crying for any kind of test that will clear and clear all doubts forever."
