

Dear Dal,

2/17/95

Still bogged down in NEVER AGAIN! proofs. Heavy cutting in wrong places with errors introduced. Just heard I've gotten them to restore the subtitled they eliminated without consulting me but it is too late for the cover! So the cover does not indicate what the book is about! The cutting violates our agreement but there is not a thing I can do about it now. To a large degree the character of the book was changed by it but it remains powerful. And I think it will add to your(pl) understanding of the autopsy and what relates to it. And of the people involved in and with it. And about Humes' call to Perry from the autopsy room. In Afterword.

= It all changed as soon as they knew Oswald was dead. That part of NA! was really cut! But enough remains and enough is in PM. It has more on Sibert & O'Neill, too. What may be most important is in WW, under Kemp Clark: Humes told Perry what the autopsy would say. That closed Perry up pretty much.

Perhaps on the changes in the autopsy it was not much knowledge and support as it was orders. And that was military. If not cut, thoroughly in NA!

I do not know what John Newman was able to do with the real Oswald number the Commission had. I ^{Gave} gave it to him. Warren and Rankin only got it from the Texans 1/24/6. They had no court reporter there. I got it from Rankin's memo on that session. I was able to identify it as not an FBI number and as the kind of number the CIA uses from the records of both I have. I think Lonnie gave it to Wade but Wade did not confirm it and Lonnie will not talk about it. Both are friends.

It was a bit startling when the windscreen as you call it got splattered along with the entire car. Cleaned up by the contractor, thanks. It was a very thin oil and under high pressure. It was more than four traffic lanes broadside of me.

Andy as The Last Hurrah was first in touch with us when he was an undergraduate in one of the Carolinas. He and Linda and good people.

Thanks for your good wishes. We are about as well as we can be.

I've Not forgotten Don's letter. I want to be able to take time to tell him that Hemming (name misspelled Hamming once in what he sent), is a most undependable ~~source~~ source and what Summers quotes of him on "crypto" reflects Hemmings ignorance of it, not his knowledge.

Our love,
