

Callaghan's Deck

The edges of the hole torn in the Q76 shirt collar, the edges of the three tears on the collar of the Q78 suit jacket and the material near the torn ends of the K27 necktie were contaminated with traces of lead which could have come from a bullet or ^{from bullet fragments,} the lead contaminating these items could not be associated with a particular bullet or lead source.

Value or Testing
Sample of lead for
Spectro to Neutron Activation
Test - only used about a
microgram - not much.

Black suit coat had
 two longit. tears on
 collar (right side) just
 above the V cut on collar
 one round shaped hole
 or tear just below
 seam

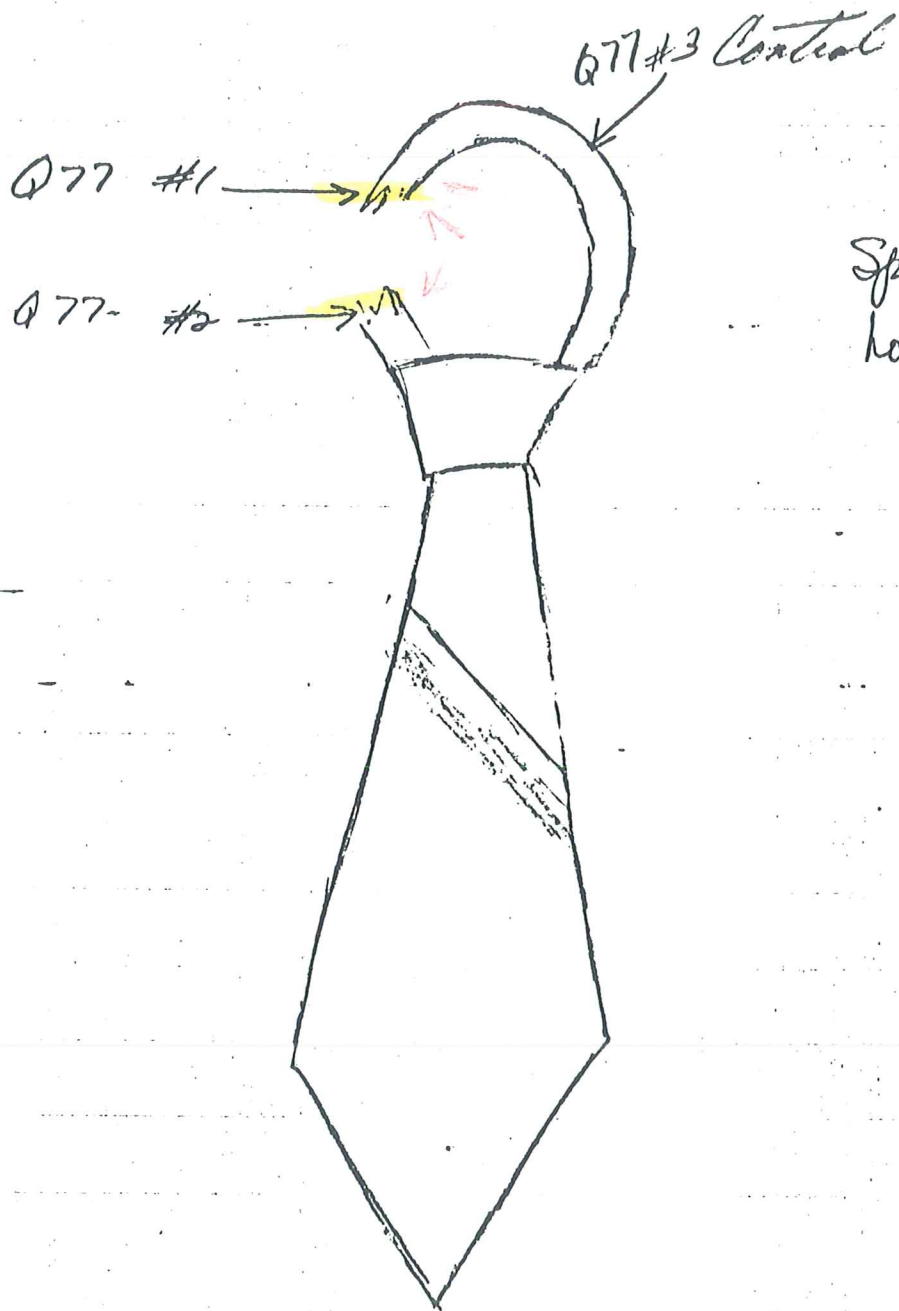

none of these holes or
 tears went through the
 backing material or the
 collar of the coat.
