@ Is it legitimate to question the official truth of the JFK assassination. That is to raise questions about the conclusions of the Warren Commission Report?

Those who do are usually dismissed by the MSM (main stream media) as “conspiracy buffs,” “flat earthers,” and kooks who wear tin foil hats to keep the CIA from stealing their thoughts, etc.

Cite from Janos interview with LBJ who was in retirement (Atlantic Monthly July 1973)

BOT in the Russell chapter you find that Russell did not believe that Oswald acted alone and he did not believe in the S/B theory. . . . neither did LBJ if he was telling the truth.

@ The medical and photographic record of the assassination does not support the government position.

We saw some of this in the class presentations.

@ Initial tests on Oswald do not support him as a shooter. . . . and Latona did not find Oswald’s fingerprints on the alleged assassination rifle.

@ The so-called “Magic Bullet” is precisely magic.

*just* — magic!!!

@ Oswald was anything but an unknown “loser.” He sure got around. Russia and back. He was welcomed back to USA (State Dept even paid his fare back). He was never questioned by the CIA and ONI about what “secrets” if any he gave away to the Soviets as the price of being allowed to remain in country. He was allowed to bring his Russian wife back with him at the height of the Cold War.

@ The Mafia did it. . . .
