ADA

Hoover would pull his investigators off the case - ~~was~~ have them set on their hands.

Check w/ Rosen's words in the Allen tickler

P. 9 On the matter of Oswald's execution by Ruby. Have class check w/ Allen's Tickler file. Be sure to mark those entries that are obvious and clear. . . In the case of Ruby's killing Oswald . . . see indication of Hoover's suspicions. . . But in CD -1 there are just 2 references to Ruby's access to Oswald. One exhibit of the layout of the basement where the assassination occurred and the other is the shot of Ruby shooting Oswald. . .

About half of CD-1 consists of a bio of Lee Harvey Oswald

P. 14-15 Hoover's falsification of the evidentiary basis for CE # 399 being the bullet that was recovered from JFK's body. . . .

P. 15-16 He notes Hunt's work on the "Magic Bullet" . . . as exceptional. The title is "The Mystery of the 7:30 Bullet." I believe I have this. . . Here is an accumulated sources that blow the CE #399 story out of the water. . .

P. 17-18-19 He covers the dilemma of the Tague bullet. . . w/ material I did not cover. . .

P. 20ff Here I need to review about the paraffin tests on Oswald. . . He cites Hal's work on the paraffin tests*****Also see Hancock book as cited.

P. 23 Notes on the Minox camera . . . DiEugenio started on this business with the first installment on Bugliosi. . . Part I.
