

Topic: Blaming the Kennedys

Autopsy matters:

Finck at the Garrison trial tried to palm off the responsibility for not dissecting JFK's back wound to the Kennedy family prohibition against excessive mutilation of the body. (Actual fact was that Adms. Kinney (Surgeon General of the Navy) and Galloway(head of the Bethesda Hosp) were controlling the autopsy. Once it was announced that the bullet (CE#399) was found at Parkland Hosp. the autopsy stopped.

FBI did rejected a copy of the official autopsy report when offered by the SS because it argued that the Kennedys did not want the report to circulate. (Can you believe that ).

Autopsy photos denied to the WC's assistant councils who were writing the report because of the Kennedys' sensitivity about privacy.

The autopsy prosectors when they appeared before the Warren were restricted to using Ryberg's medical drawings of JFK's wounds when testifying. Once again this was blamed on the Kennedys.

Note McCloy's appearance on "Meet the Press" where he trots out this old chestnut---blaming the Kennedys.
