@ Grading: How to interpret grading. Excellent is an A; Very Good is a B; and Good is a C.

@ As the case stands today in terms of evidenced I think all you can blame the FBI with the JFK case is the cover-up. . . . I don't think Hoover was part of the conspiracy or was knowledgeable about any plans to take down Kennedy.

@ Make point: That the SS in the Post WW II period was not equipped to reasonably feel secure in providing wall-to-wall (so to speak) security for the President and Vice President. The SS was running a horse & buggy operation in the age of the Jet aircraft. . . . Adequate for protecting Presidents Woodrow Wilson of the world but not post WW II heads of State. (point: Hoover had 2 limos that had bullet-proof bubbles and undercarriages that were bomb proof. . . . The SS had nothing like that

@ Recall: Last period I noted that FBI Agent Marvin Gheesling took Oswald's name off the FBI "Flash" list or alert list. . . . w/o Hoover's permission. Who got to Gheesling—the CIA??? (boxes within boxes) . . . a Rubic's Cuba. . .
