

Tainting Evidence

Notes (use w/ slamming the FBI Lab)

Phrasing:

Physical evidence is the silent, definitive witness. . . Use that w/ the evidence (or lack thereof) when Oswald was placed in the frame on 11/22.

Too Hoover image was everything. . . Use this w/ FBI "CA" on the WC

Faking science. . . Day and the lifted palm print. . .

Running the investigation backwards, starting w. a hypothesis of guilt, then going out to try and prove it. . .

Giving into investigative pressure. . . (all the forensics that exonerated Oswald had to checkmated. . . The palm print on K1 was the response. . .

No surprise the FBI crime lab was working for the prosecution in the Oswald case. . . so foreordained conclusions were the expected. . . Investigations were run backward to reach preordained conclusions . . . nowhere was this truer than with the FBI Lab . . .

Every move the FBI made would have handed a grenade to the defense had Oswald lived to go to trial. . . (conclusion: he could not be allowed to have a trial).

This Orwellian world of institutional bias. . . w/ internal FBI investigations (p. 150). . . (Internal FBI).investigations run backwards

FBI institutional bias was generic, the bureau. . . inability to investigate itself was pervasive. . . the failure to file documentation or even destroy incriminating paperwork not abnormal . . . and unwillingness to hand over discovery or exculpatory information was direguier. . . If there was a conflict of interest the facts or justice would have to take a back seat or even be ignored if there was a conflict of interest. . . (p. 160-161)
