File # 62-109860
Lab. # PC-78701 JV BX

Examination requested by: FBI, Dallas (100-10461)

(Let. 12/21/63)

Examination requested: Micro. (Fibers) - Firearms
(Gunpowder Tests)

Date received: 12/26/63

Result of Examination:

Examination by: ~~STO...~~
FRASIER

*Rpt.
12/31-63
PMS: dhj*

*[3 glass slides]
[1 pill box]*

Specimens submitted for examination

Q350 Blue jacket

Debris from Q350 placed in pillbox
Hairs from Q350 mounted on a slide
Known fibers from Q350 -
blue / faded blue - 1 slide
lining - 1 slide

Hair hairs - Brown - some chips -
match - K7 hd. hair of Oswald -
Several brown hair hairs - his own.
in case - do not photograph -

Q350 - Known fibers:

Lining = light gray lustrous viscose (unspinning)
Outside = warp - approx. 90% viscose (1/2 lustrous, 1/2 delustrated) - gray-blue
" 10% NYLON (delustrated) - gray-green
Filling - all lustrous viscose - gray-blue

no fibers on K1 from ... to show comp. Q350 jacket.

Re: **LEE HARVEY OSWALD, Aka;**
IS - R - CUBA

File #
Lab. # **DC-78701 JV BK**

Examination requested by: **FBI, Dallas (100-10461)** (Lot. 12/21/63)

Examination requested: **Micro. (Fibers) - Firearms** Date received: **12/26/63**
(Gunpowder Tests)

Result of Examination: Examination by: **STONBAUGH**
FRAZIER

The jacket, Q350, was microscopically examined and chemically processed to determine if any gunpowder residues were present and ^{NO} nitrate or nitrite ~~of the type~~ such as would be present in gunpowder residues ~~was found~~. It is pointed out that the absence of ~~any~~ ^{nitrate and nitrite} gunpowder residues does not necessarily indicate that the jacket was not worn by a person firing a weapon since such residues are not normally deposited on a ~~shirt~~ ^{specimens submitted for examination} clothing.

Q350 Blue jacket

No nitrate on Q350 - Sleeves treated chem.
No vis powder
No " " smoke
