DATE 7/17/10

4
DL 89-43

"The paper of the wrapping and the tape, Q10, were found to have the same observable characteristics as the known wrapping paper and tape, K2, from the Texas Public School Book Depository.

"The inside surface of specimen Q10 did not disclose markings identifiable with the rifle, K1. A number of indentations, folds and extraneous markings appear on the inner surface of the Q10 wrapping.

Cady
"The latent prints appearing in the photograph taken of the rifle, K1, by the Dallas Police Department, are too fragmentary and indistinct to be of any value for identification purposes. Photographs of this weapon taken by this Bureau also failed to produce prints of sufficient legibility for comparison purposes.

"A latent fingerprint was developed on the wrapping paper, Q10, which was identified with the left index finger impression of Lee Harvey Oswald. In addition, one latent palm print developed on specimen Q10 was identified with the right palm print of Oswald.

"No latent prints of value were developed on Oswald's revolver, the cartridge cases, the unfired cartridge, the clip in the rifle or the inner parts of the rifle.

"Specimens Q1 through Q5, Q14 and Q15 are being retained in the Laboratory until called for by a representative of the U. S. Secret Service.

"Specimens Q6 through Q13, K1, K2 and K3 are being returned to the Dallas Police Department by Special Agent Vincent E. Drain of the Dallas Field Office of this Bureau. The photograph of the latent print on the rifle is being returned separately. The fingerprints and palm prints of Oswald are being retained."
