SUBJECT: ASSASSINATION OF PRESIDENT
 JOHN FITZGERALD KENNEDY
 NOVEMBER 22, 1963
 DALLAS, TEXAS
 MISCELLANEOUS - INFORMATION CONCERNING

SYNOPSIS:

A letter was received from Harold Weisberg of Hyattstown, Maryland enclosing his book, entitled "Whitewash - the report on the Warren Report." He believed that immediate and unequivocal explanations are required from the FBI in connection with the FBI's report to the President's Commission. He specifically demanded answers to three items.

(1) Relating to the number of bullets which were involved in the assassination he suggests five were fired. The Commission's report concludes three shots were fired.

(2) He states that in testimony before the President's Commission evidence was not introduced as to the spectographic analyses of a bullet and fragments. This is absolutely incorrect, since the testimony of a FBI Laboratory expert concerning spectographic analyses is set forth in the Commission's report.

EX-103 REC 53 62-109060-4132

(3) Weisberg alleges the whole bullet (located on Governor Connally's stretcher) had been wiped clean and that the FBI Laboratory expert testified that the cleansing of the bullet was not complete and that foreign matter remained in the grooves of the bullet. This is inaccurate since our Laboratory expert testified the bullet was clean when he received it and that there was no blood or tissue present.

JUL 1 1966

Weisberg formed his opinions after reading the FBI reports to the President's Commission dated 12/9/63 and 1/13/64. Both of these are located in the National Archives and are available to the public.
