

Dear Hal,

Sunday

I am a little late because I could not locate Weigman #108 for the life of me. I finally gave up and Sunday night I was fishing through some miscellaneous folders and up it popped—mirabile dictu. I am convinced that I have gremlins in my records.

I am including two other pictures. I have attached a note to the Richter shot of Lovelady. I assume you were aware of this photo and the circumstances but I thought I'd send it on loan just in case it is new to you.

I like the fact that the FBI took Lovelady's picture the day after the assassination but never bothered to trouble him to wear the shirt he allegedly wore on 11/22.

I hope you can make good use of these,

Jerry
