Re: Guide with pictures

Note I have some of these pictures in glossy print from Archives II in College Park, Maryland. These are identified with **

First set of pictures:

- A. FBI pictures of the alleged “sniper’s nest” on the S.E. Corner of the Texas School Book Depository. Reveals that the window was only about a foot from the floor.
- B. I have a large glossy print (**) that is more helpful as far as detail is concerned.
- C. More FBI photos of the “sniper’s nest” and the alleged arrangement of the cartons.

These pictures used in conjunction with Howard Brennan’s testimony and account covered in Chapter 6.

-
- D. Photo taken by Dallas police looking over the barrier of book cartons where the alleged murder weapon was hidden. I have a glossy of this that provided much sharper detail.

This picture is used to support the testimony of Weitzman and Boone in Chapter 5.

- E. This is the sketch made by Parkland Memorial Hospital engineer Tomlinson. It depicts the two carriages in the hallway separated from Trauma Room One where Kennedy’s body remained until it was removed from the hospital.

Use with Chapter 11 dealing with the location of the “stretcher bullet” and the Tomlinson/Specter exchange. I use it to support the view that CE#399 did not come from Governor Connally’s stretcher.

-
- F. This is FBI photo of the so-called “Magic Bullet,” or CE# 399 that the Commission alleged responsible for all the non-fatal wounds in JFK and Connally.

Used with Chapters 10 and 11.
