Folder # 7 (Need here to shuffle these docs into some chron. Order)**

→ Box 110A Folder 12

1. Freda Scoby folder RG 272 on the Walker incident. She notes the following (1) no one ever saw Oswald near the Walker home (2) the bullet fired at the general did not match ammo from K1 (the alleged JFK murder weapon), (3) as to the note it referred to no independent event that could be associated with Walker and the April 10 shooting into his residence. In short, no evidence linking Oswald to the Walker shooting. . .
2. Cadigan WC testimony 7H p. 437 He gives reasons why letters in Cyrillic language were written by Oswald. . . Was one of these the Walker note???! will need date of Cadigan's WC testimony on this. Key notes on the Walker Note. . . . FBI assertion that it was written by Oswald. . . Cadigan's WC testimony. . . Items of interest w/ this document:

NOTE TO MYSELF: READ WHAT I WROTE ABOUT WALKER NOTE IN

WALKER NOTES (NEW DOCS), p. 2

4. Fbi REPORT CONCLUDES THAT Oswald did write Q 51 (He wrote there 17 pages on Holland American Line. . . Also K4 & K5 are the standards for judging Oswald's handwriting. See attached 4B.
5. Griffith to Conrad 12/2/'63 62-109060-4180-EBF Part I FBI determines that Q67 from Oswald's wallet Fair Play For Cuba Comm. New Orleans Chapter, issued 6/15/'63 bearing signatures Lee Harvey Oswald and A.J. Hidell, was not LHO's writing based on K4 & K5. (Marina signed these)
6. Is old 10. . . FBI going through games here. . . K4 & k5 as standard comparisons for Oswald's handwriting . . . in this series of docs. The FBI adds Oswald's handwriting a new standard from an "electric or gas service order" [Q40 which somehow becomes Q 43] as another standard for comparison of Lee's handwriting . Of course all this is despite the fact that LHO's prints are not on the "Walker Letter."
7. Story in Frederick Post (Ivans case) deals with FBI's phoning up finger print evidence against Dr. Ivans. . . FBI wrong in tying fingerprint evidence to the suspect Ivins. . . ****
8. Note to myself on this subject. . .
9. Batch of docs showing how FBI used K4 & K5 as the standards for matching Oswald's handwriting to the Q 207 (Walker Note) . . .
10. Collection of docs that appear to be of little use. . .
11. Hoover to Rankin, 1/17/'64 105-82555-1414 Page 2 Hoover gives the impression to Rankin that the FBI was right on top of the Walker shooting from day one. . .and volunteered to run tests of the recovered bullet . . .but Dallas PD was not receptive. . . .Marina would according to Hoover be the one who brought to their attention (the FBI) the incident with Lee and Marina's holding him in the bathroom, etc. . .
