Inventory of FBI Ticklers to Mark Allen delivered 2/19/'85

Location: Hal's basement

Page One

1. Hal's cover notes
2. Tickler on Marguerite C. Oswald that states Mrs. Oswald is "mentally unstable." Date of Tickler is June 28, 1966 from General Investigative Division. This kind of characterization would be used in blind memoes and to destroy her credibility as a critic of the WC Report and the FBI.
3. FBI has advance copy of a New York Times Review of Books dealing with Prof. Richard Popkin's The Second Oswald. The book review was to appear July 18 (1966?). Raises some questions about the disparity in the autopsy and the FBI report. This was one of those areas that Hoover was to address. Associated with the Epstein letter.
4. Jones to Wick 6/24/'66 re: Discusses a request from Paul Hoch, that came into the Crime Research Section. Hoch was a grad student who wanted some help from FBI doing research on the JFK assassination. Hoch had prepared questions on the disparity over the autopsy, etc. Recommended that he be told that liaison btw. FBI and SS was excellent. . . .But to say nothing about the questions over the autopsy.
5. Four news stories from Dallas papers on the Hosty transfer/also on his supervision, Ken Howe, who was disciplined. All stories in 1964.
6. Report of Ruby killing of union official in Chicago in 1939. Not copied
7. A batch of stuff on the Garrison case (Not Copied.)
