

Memorandum

TO: Mr. Callahan

DATE: 4-15-64

FROM: L. Gauthier

SUBJECT: ASSASSINATION OF PRESIDENT JOHN F. KENNEDY
EXAMINATION OF VISUAL AIDS BY
PRESIDENT'S COMMISSION

Reference memo Gauthier to Callahan 4-7-64.

Staff members of the President's Commission and specialists of the armed services, Drs. Humes, Heany, Fink, Light and Olivia (ph.) attended a conference on 4-14-64 for the purpose of reviewing motion pictures and slides of the assassination site. Representatives of the Secret Service and the FBI were present to assist in projecting the film and the use of the scale model.

Dr. Humes, U. S. Navy Commander, who performed the autopsy on the President, appeared to lead the discussion throughout the 4-hour session. All of his associates were generally in agreement with previous findings of the Commission as to where Shots 1, 2 and 3 approximately occurred.

The most revealing information brought out by the doctors is as follows:

1. That Shot 1 struck the President high in the right shoulder area, penetrating the torso near the base of the neck damaging the flesh of the throat but not tearing the throat wall. This bullet, according to the doctors, continued and entered Governor Connally's right shoulder, emerging below the right nipple. The velocity of the missile, according to the doctors apparently was snagged in the coat and shirt, eventually falling out on Connally's stretcher.
2. That Shot 2 struck the wrist of the Governor, continuing on into his thigh.
3. That Shot 3 struck the right side of the President's head, carrying much bone and brain tissue away, leaving a large cavity. There is nothing controversial about where Shot 3 occurred inasmuch as the Zapruder movie indicates with much clarity when this happened.

Heretofore it was the opinion of the Commission that Shot 1 had only hit the President, that Shot 2 had entered the Governor's right shoulder area penetrating his torso through the chest area emerging and again entering the wrist and on into his leg.
