

Early Evidence #1

Formatting for writing Parkland Drs on JFK's Wounds

Point: With JFK's clothes. . . . Locate where the spectro on JFK's collar reported only chromium metal present (scalpel)Ask Clay.

Point: Can I develop the bubbling in the neck wound as a sign of possible bullet hitting the lung. Autopsy report notes ecchymosis on apex of the lung (right or left?). Meaning: this could have been caused by shock waves set off by a bullet.

If JFK was hit by a shot in the posterior neck then right side of neck should have shown severe ecchymosis.

Point: If I can make a case for frontal shot via medical evidence then that gives great traction to witness testimony of a shot from the front of the motorcade.

Doc. 1 Key w/ Handwritten notes that suggest associations to be made and points stressed. Be sure to see White sheets on Parkland Drs WC testimony y on JFK's neck wound attached.

Press stories et al on possible bullet in lung:

- NY Herald Tribune 12/19/1963 "stated that first bullet lodged in Kennedy's lung." No attribution from VP p. 3 Parkland Hosp. Doc. # 2
- Notes from DR Clark 6H WC testimony. . .w/ Specter. Clark explains why reported to NY Times on 11/27/1963 that neck wound was wound of entry. He gives reasons on p. 28 why all who worked on JFK believed he had a bullet in his chest. With WC testimony Clark backs away. . . .Of course he has been visited by FBI/SS and shown official autopsy protocol;. . . .^H21-30

Formatting Parkland Drs testimony

for entire exchange. . . And Specter's use of hypotheticals. See attached to Doc. # 1

- VP p. 7 Under McClelland under Parkland Hosp. Cites St Louis PD on SS pressure of Drs to change on the neck wound as a wound of entrance. . . Also cite of SS Moore who pressured Perry to back off.
- Also see Dudman in ST Louis PD interview with McClelland on 12/21/1963 in which McC says "that they still believe it [neck wound] to be an entry wound."
- CE 392 report by Carrico 11/22/1963 notes "small penetrating wound of ent. Neck." VP. P. 12
- VP p. 13 Carrico retracts on the neck wound in JAMA article 1992. Says all shots from above and to the rear as stated in official story. . .
- Dr. Ronald Jones in 6/19/'92 interview in VP p. 15 says that throat wound "was compatible w/ an entrance wound. . . I would stand by my original impression."
- Dr. Paul C. Peters VP, p. 17 speaks to the general consensus among Drs in emergency room on 11/22 that neck wound was wound of entrance.
- Nurse Margaret M. Hinchliffe ^h 141 & 143 VP, p. 33 says throat wound looked like an entrance wound. Note check her WC testimony and how Specter tried to get her to say it was a wound of exit. . Did she show any resentment . . .at his bullying, if he was bullying.
- PP 35 Dr. Burkley stuff

- ***** Note: Section 6 was the only physician if only to remark that
Page 3
Formatting Parkland Drs & JFK's wounds

Who was in the emergency room at Parkland and at Bethel Hosp and never called as a WC witness. . .

p + VP on SS pressuring drs on the neck wound.

P. 90 Statement from HSCA 37-39. Does this call for a resounding criticism????

In Doc. # there is a list of all Parkland drs who were in emergency room with JFK and their WC testimony. . . Review for any support for a bullet or wound on the lung.

Newspaper stories on JFK wounds

- NY Times 11/27 Herbers cites Clark bullet struck him in neck and "ranged downward in his chest and did not exit." Doc. # 1
- NY Times 11/28 Perry left Dallas on Monday

Notes Perry had tube inserted . . . keep lung from collapsing.

Doc.# 1 attached

Doc. # 6 Loftus NY Times 12/6/'63 Notes how could the prexy be hit frontally in the neck by a lone gunman shooting from the rear. That president turned to his rear to wave and was hit by a shot from the rear. . . Recall that McCloy raised this at 12/6 Ex. Session of 12/5 session . . . Check.

Doc. # 7 NY Times 11/24 notes small entrance wound in the neck.

Doc.# 4 NY Times 11/30 Carries good stuff on the first minutes when JFK was brought into the emergency room. "He's bubbling

air," (I think that was Clark) This means a hole in the lung. . . mentions Drs. Peters and Baxter (I want to check their WC testimony). P. 2 note that Parkland had the largest emergency facility in the county. . . and served as an emergency hospital. Drs saw all kinds of bullet wounds. . .

Doc. 5 attached St Louis PD Richard Dudman 12/1/'63 This story plays up the throat wound as a wound of entrance. .

McClellan is quoted as some length on this. . . Good source.

Doc # 8 St Louis PD (probably by Dudman) 12/18 basically how the Parkland drs changed their views on the throat wound after being "visited" by the SS. A Good piece to review carefully.

Doc. # 9 St. Louis PD 11/24 Jimmy Breslin on JFK's last minutes.

Doc. # 10 After emergency procedures done—accounts of the drs treatment of JFK.

Doc. # 11 Description of JFK's back brace. Sourced 2H125
