

FILE ON MOTORCYCLE COPS STATEMENTS

Best Copy

1. 1975 WAS time when FBIHQ learned about the motorcycle cops that were never interviewed by the FBI. Jackson's statement is noted. Clear that for him Connally was struck by the 2nd and separate shot. 62-109060-7344.

62-109060-7345 recommends that since they talked to Jackson no need to talk to others.

Director Kelley asked how many jockies were there. There were 18 motorcycle jockies altogether. The FBI interviewed none.

What they did for look for they did for find

2. Hal on cop Martin's WC testimony. . . He was splattered by blood and tissue while he was riding back and to the left of the limo. Suggesting that the direction of the spray best explained by a shot from the front (stockade fence).

3. Bobby Hargis WC testimony. . . He was outrider with Martin on left side of limo and sprayed with gore. He was not sure of the number of shots. . . he says could have been 30 or more to stress the point that things were moving so fast . . . He noted that the limo slowed down . . . before or after the head shot???? Part of his testimony suggests a shot from the west—the stockade fence or grassy knoll.

4. My piece I did for Lancers on Jackson's written account of the shooting with background.

5. Jackson's 6-page account of the Dealey Plaza shooting.

Left in folder 26A

6. Hal's notes from CA 75-0026 that are most useful with the motorcycle cops as witnesses. Especially Jackson's saying that JFK was struck above the right ear. Make point about the number of years these men served in law enforcement.

7. Hal's letter to Quinn Shea has repeat point and good initial impressions. Review closely. Stress also that both Chaney and Jackson helped carry JFK and Connally from their cars into the hospital. They had close look at each victim's wounds. Another reason for FBI to ignore them and other jockies.

8. Cooke to Gallagher 9/12/1975 62109060-7256 (S 180) See especially p. 3 for Malley's ridiculous and self-subverting reasons why he never lined up the motorcycle cops for questioning. . . *****

9. Rosen to Belmont 12/6/1963 p. All the trouble the FBI took to interview 98 Dallas cops and others who were in the basement when Oswald was shot. FBI builds up stats when they reflected well on the bureau and ignored witnesses like the motorcycle cops when their testimony might be probative. . . ***** Be sure to make this connection.

13. Cooke to Gallagher 9/5/1975 Revill is cited as telling SA Brown that Curry told him about his impression that there were two gunmen.
