10/31/92

Dear Henry,

Please excuse this long delay in responding to your welcome letter of 8/3 but it got lost in the clutter and confusion of my desk. In writing a few minutes ago I was reminded of you and that reminded me of your letter.

My health has not improved, I'm weaker but I'm still chugging on close to three cylinders working on a book that has already grown much too long.

Seems like the doctors can't come up with anything safe for me on the sleep apnea so I've ~~more~~ more or less converted it in part to an asset. When I'm wide awake at 1 a.m. it is peaceful and quiet and I can work well and much.

Your comment on my knowledge of the assassination reminds me of an FBI defense against my allegation of perjury in one of my FOIA lawsuits that I saw recently. Their pleading said I could make such charges ad infinitum because I know more about the JFK assassination than anyone in the FBI. Believe it or not, that worked. The judge did not pay any attention to the proven repetitive perjury.

I'm working on a book without an agent or a contract with the idea that it will help perfect the record for history. When it is done I'll see if I can find some publisher interest.

Haven't heard from anyone down there is a while. I suppose my general opposition to unproven conspiracy theories presented as fact may have something to do with it. So I do not even know what is in the police files that were released.

Except for the confirmation of the big favor you did me in 1968 in getting me the truth about those "tramp pictures." The records confirm what you told me. And it then helped me prevent another national disgrace that was in the works.

I take it from your letter that you are OK. Hope so. Sorry I can't get down there. Travel is too dangerous for me. I'm never out of Frederick except for medical reasons. There are some stories I think you'd enjoy.

Stay well, your friend,

Harold Weisberg
