

don't know yet who authorized the ONI post-assassination investigation but if their investigation lead to a conspiracy conclusion, I believe that the CIA with a much greater volume of data on Oswald, had to have made a similar investigation, and I believe with a similar conclusion. It makes Lifton's thesis about an initial autopsy at Walter Reed more believable to me.

*not done*

I had a chance to speak again with Don this week, and was able to document some of the details of his previous interview together.

1. Almost all the staff in the Washington DC headquarters, between 25-30 agents, participated in the initial attempted investigation. Lt. Col. Brewer had a central role in the coordination of the investigation. *Don* about the files and the post-assassination investigation.
2. The final report that went "upstairs" was in the form of an executive summary, approximately 10 pages long. The investigation produced between 600 to 700 pages of supporting documentation.
3. The ONI investigation team viewed the Zapruder film as apart of their work. Don thought that the film was the CIA's copy. The investigators viewing the film believed that the head shot came from the front. They also analyzed the bullet trajectory for the CE 399.
4. ONI did not investigate any subject related ~~to~~ in any manner with the autopsy, Don's belief is that they were directed away from this aspect, because it was the Navy responsible for the autopsy.
5. ONI secured a M/C rifle similar to Oswald's. There was no question in their minds that it was a piece of junk. They were unable to duplicate the timing or accuracy attributed to Oswald by the FBI.

*directed*

6. WHO DONE IT?

- a. One entire area of classified information that has not come to the surface involves the intelligence information secured and evidence collected regarding the radical right wing business community.
- b. I mentioned the Hunt / Oswald / Davis meeting. ~~to~~ According to Don a person in Hunt's organization, who Don believed to be the source of the meeting tip, was killed in an auto accident at the same time ONI began its post assassination investigation of Hunt.

*Should I ask?*
