

FBI/SB Theory

Re: Writing Strategies

Source: File FBI Rejects S/B Theory

Docs. on FBI refusal to accept JFK's official autopsy protocol/blaming the Kennedys
Docs 1, 3, 5, 9, 10Doc, 5 is Sibert/O'Neill report on autopsy including all the
medical evidence that SS made offer to FBI but was rejected by Rosen. . . along with 11
X-Rays, and slides and film.

Doc. 5 Siebert/ONEill reports on 11/26/163 on 40 like particles. . . Also on JFK back
wound that was 45-60 degrees in downward location . . .From get-go FBI could not buy
into the S/B theory. . .See Doc. 12 below

Doc. 5 p. 4 notes w re: found bullet (CE# 399) found on stretcher with that contained
stethoscope and a pair of rubber gloves. This was not Connally's carriage.

Doc. 7 Sibert/O'Neill to report to WC . . . interviewed by Specter. . .Never appeared
before the Commission. Both were interviewed by Malley on 3/12/'64. Was it before or
after Specter interview. . .neither went before the Commission for obvious reasons
related to the official story of S/B. . .was this "theory" in place by March or was Specter
working on it. . . ???

Doc. 13 SAC, Dallas, to Director 12/13/1963 Notes that the official autopsy report
with its thru and thru wound from JFK's back to exiting his throat does not square with
FBI's Sibert/O'Neill report findings. . .This is first FBI recognition that its views of
JFK's back wound do not jibe with the official autopsy report. . .KEY DOCUMENT.

Doc. 14 classic blaming the Kennedys for why the FBI did not access the official
autopsy report.

Doc. 11 4/22/1963 Connallys with FBI review the Z film on 4/21/1963 Both the
governor and wife agreed that Connally was hit be a separate bullet. . . This squares with
the FBI/SS version of the shooting. . .

Doc. 12 Hoover insists in 1966 that all three shots hit and none missed. . . FBI ignoring
the Tague bullet. . . .
