1. MSM nonsense capsulized in review of Buggsie's book by NY Times reviewer Bryan Burrough's. . . .Clearly a "known nothing" when it comes to the JFK assassination. Provides list of nationally known inside the Beltway names who can be found in the conspiracy camp.
2. See my notes on the back of the pageattack on the slap-dash dismissal of grassy knoll witnesses. . . .but readiness to believe that all these two-bit psycho types with one shot could alter our history. No questions asked about the official solutions.
3. Story that D.B. Thomas adds weight that shot came from the grassy knoll.
4. Report to Rankin from CIA 11/13/1964 on foreign response to the Warren Commission Report. . . .
5. Docs showing the cooperation between CIA and FBI relating to what each would say to WC regarding any association with Oswald. . . Use in passing; perhaps as a footnote.
6. Reports by 5 people who said that they ran into "Secret Service" men on the Grassy Knoll area in Dealey Plaza
7. Clobber him. Here is James Pierson's crap book *Camelot and the Cultural Revolution: How the Assassination of JFK Shattered American Liberalism.* Written by an oaf of the right wing who knows nothing about the crime. How he is celebrated by the AEI, voice of the American oligarchy.
8. Piece by Morley on DPD dictabelt that might have picked up shots from the grassy knoll. Problem: I cannot identify the source from this copy.
9. Chris Mills "The Man Who Wasn't There" Presents an argument that the SS agent on the Grassy Knoll was as SS agent, Thomas "Lem" Jones . . . and his appearance is explained by Mills.
10. Robert Parry's essay on the death of Gary Webb, who blew the lid on Contra drug smuggling w/ assist from the CIA. How he was hounded and something on his death. Does he accuse the CIA of a contract killing???? Part of conspiracy in our history.

Defense of Conspiracy, p. 2

Defense of Conspiracy, p. 2

11. Krauthammer of the Wash Post has quotable material that is so sweet on conspiracy in history. K is right-winger and while he would bully rag anyone who supports conspiracy in the JFK case he is quick to make a case of same when it involves the Russians. . .
12. Good language on conspiracy by Krugman. . . .excellent stuff
13. Chris Hayes has useful piece on the paranoid style a la Hofstadter. Worth a review
14. Murry Rothbard piece on revisionism. . . .as a good counter to conspiracy theorist. . . .might want to review with care.
15. Hal Verber's "How the History Channels Handle JFK's Assassination." A careful review is essential.
16. Handy reminder of conspiracies in contemporary (use this term) examples in US history. . . .(what is the source of this???)
17. Notes here that US media responded to the 30th anniversary of Dallas by reviving the WC motives for LHO's killing of the president: in the words of Gerald Posner: that "others failed to recognize his stature he thought he deserved. . . ." and this pissed him off. That cannot be allowed to be repeated when the 50th anniversary rolls around. Quote from Posner's "Case Closed," 220. Like the dog returning to his vomit.
18. Earl Golz story on witnesses account of SS men on the Grassy Knoll and in the parking lot area. . . Needs to be studied. . .
19. Mark Danner piece on Saddam but language is spot on for how the conspiracy account of Dallas is gaining more and more credibility. . . .as we approach the 50th anniversary ***** Good stuff
20. Piece on acoustics and shot from the Grassy Knoll . . .
