

Wm Kemp Clark 6th

p.

p. 28-29 - follow up on Lee's

Clack backs away - ~~express~~ that  
this ~~bullet~~ bullet in chest was made  
based up witness observations -

Speck ~~also~~ - <sup>was</sup> were there any external  
indication that there was a mark in the  
chest?

(pp. 28-29)

Clark: No, Sir.

Note: If the deep wound was a wound of  
entrance - with all the other factors  
Clark enumerated on p 28 -  
then assuming there was a bullet  
in the chest was a reasonable logical  
conclusion

Clack's bulletproofing comes after DRS had  
been visited by FBI + SS - and had been  
shown the official autopsy protocol
