

## PART 1

# Parkland Hospital

### 1) Dr. William Kemp "High Pockets" Clark, Chief Neurosurgeon:

- a) WR 516-518/ 17 H 1-3 / CE 392 [undated summary; see also 21 H 150-152 :Clark's 11/23/63 report to Admiral Burkley with the verbatim summary . In addition, see "Assassination Science", pp. 416-418: this is an FBI report dated 11/25/63 which includes the verbatim summary to Burkley from 11/23/63]---".in the occipital region of the skull..."; "There was a large wound in the right occipitoparietal region..."; "Both cerebral and cerebellar tissue were extruding from the wound.";
- b) WR 524-525/ 17 H 9-10 /CE 392: handwritten report 11/22/63---"The President was bleeding profusely from the back of the head . There was a large (3 x 3 cm) remnant of cerebral tissue present...there was a smaller amount of cerebellar tissue present also"; "There was a large wound beginning in the right occiput extending into the parietal region...";
- c) Parkland Press conference, 11/22/63, 3:16 PM CST ["Assassination Science", pp. 427]---" A missile had gone in or out of the back of his head...the back of his head...I was busy with his head wound...The head wound could have been either the exit wound from the neck or it could have been a tangential wound, as it was simply a large, gaping loss of tissue.";
- d) "New York Times", 11/24/63---"Dr. Kemp Clark...said that there were two wounds, a traumatic wound in the back of the head and a small entrance wound below the Adam's apple...He said the [head] wound was 'large with a considerable loss of tissue'" (the same day, ""The Los Angeles Times" reported that "The occipito parietal, which is a part of the back of the head, had a huge flap.");
- e) AP article, 11/26/63---"...said in Dallas today that a bullet did much massive damage at the right rear of the President's head...A missile had (come or gone) out the back of his head...";
- f) "Washington Evening Star", 11/27/63---"Clark...said in Dallas yesterday that a bullet did such massive damage at the right rear of the President's head that attending surgeons could not tell whether it had entered or come out of the head there.";
- g) "New York Times", 11/27/63: article by John Herbers---"...Clark, who pronounced Mr. Kennedy dead, said one struck him at about the necktie knot. It ranged downward in his chest and did not exit', the surgeon said. The second he called a 'tangential wound' caused by a bullet that struck the 'right back of his head'";
- h) CBS, NBC, the BBC, and L'Express quoted Dr. Clark as saying that the bullet had entered Kennedy's neck from in front and entered the chest [see 6 H 21-30 and "Killing The Truth", p. 718];
- i) January 1964 Texas State Journal of Medicine article "Three Patients at Parkland", pp. 60-74 [pages 63-64](see "Assassination Science", p. 399)---repeats the gist of his 11/22/63 report contents: "Two external wounds, one in the lower third of the anterior neck, the other in the occipital region of the skull, were noted. Through the head wound, blood and brain were extrud-
