

JFK's Collar/Connally's Wounds

Folder # 3 *A*

1. Piece by C. Marler contesting those who argued based on George Jefferies' released film of JFK's coat bunching up on him on Main St. Marler proposes counterarguments. . . but neglects the Burkley death certificate. . .
2. From Hal's PostMortem. . . Roffman letter and Hoover response. Note that Frazier is quoted 5H61 that the slits in the collar could not be proven as "a bullet hole" to the exclusion of a piece of bone or some other type of projectile." Frazier stays on the FBI line. . . projectile never a bullet. Then see how WC Report goes merrily along and continues the fiction that a bullet made the slits in the collar and nicked the tie (See R91).*****
***** Use in my chapter
3. Hal's listing/numbers of FOIA requests et al
4. Stuart Galanor "Cover-Up" deals with the JFK wounds including the neck wound. Useful to review before writing.
5. Hal's strong words on Connally's wounds. . . but generic in what it says about the entire investigation. I could possibly use some of this language****
6. Russ Kent's on Connally's wounds/"Burying the S/B Theory. I need to review before writing*****
7. Hoover to Rankin 6/1/'64 Check Commission Exhibit # 855 what is probably X-rays of Connally's wrist. . . shows how blown out the bone was and yet we are asked to accept the almost pristine condition of CE#399*****
8. Note to myself. Says see Aguilar's IV, Rockefeller Commission on JFK autopsy p. 9
9. Hoover to Rankin contains X-rays of Connally's wounds. . . including his wrist but resolution is impossible. .
