

9. <http://www.youtube.com/watch> Deals with what happened to the JFK limo after he was assassinated. The limo was prime evidence in the assassination. The commentator worth your time is Doug Weldon who has done the best work on this topic. The point here is: Like the autopsy material, the limo held critical evidence about the president's assassination. Like the autopsy evidence this evidence was compromised. The thrust of this presentation deals with the windshield and what happened to the original when the limo was sent to Detroit's Ford River Rouge plant several days after the assassination. Worth your time.

File - marina - Re: Marina
Changing her testimony under
FBI pressure.

see meagher - Accessories -
p. 132 - on how he got
the rifle.
