WC Report. What was staged as a searching examination was in reality a carefully staged exercise intended to foreclose unwanted CONCLUSIONS.

FBI CD-1 (REPORT) OFFERED NO MORE TRUTH THAN Alice's looking glass.

The early evidence: That the early evidence against Oswald was so solid or irrefutably convincing was so untethered to reality AS to defy caricature (or parody.)

HOOVER AS LEAKER. HIS LONG EXPERIENCE (47 YEARS AS FBI HEAD) AT THIS WASH. D.C. PRACTICE RANKED HIM AS A VIRTUOSO.

17. Notes from HAL'S CA 78-1107

Intro; Note that Despite the length of the Warren Commission Report there is a substantial paucity of evidence. A fair and balanced view of the Report is that it is largely about the life and times of Lee Harvey Oswald with only superficial and passing reference to the most basic scientific evidence in the case. A dramatic case in point is the failure of the 900 page Report and the 26 volumes is the astonishing absence of the official certificate of death President Kennedy. Report was suppressed by the Commission. icial story. How Burkley was ignored by FBI and WC. . . .how he had to politic or campaign (insist) he submit a report). See Breach/(and notes). And the absence of witnesses who placed Oswald other than at the scene of the crime: Carolyn Arnold, Pierce Allman and Terrance Ford (n pp from BOT).

18. From Hal's CA 78-1107. . . .P. 134 He notes that FB never tested CD# 399 or the 5 frags recovered from the President's limo for human residue. Raises issue of whether they had ever been in a human body or were just planted by the FBI. Note that I have this in "Breach." See Frazier testimony on this and see Aguilar/Thompson piece on this Frazier's testimony on this in BOT***

19. Hal's CA 78-1107 p. 139 He notes that the first autopsy report by Humes was destroyed by Humes after it was learned that Oswald was dead. This meant that there would be no cross-examination of the Bethesda pathologists in any trial.

20. Notes that WC never had the certificate of death. . . . The Burkley death certificate (written before Oswald was in the frame) never went to Warren CommissionNote that it supported the FBI & SS's version of the shooting: three shots and three hits which has never been revised. In complete contradiction of the official Commission account of the shooting.
