Cover Note

This batch of FBI statements of TSBD employees can be used for:

Showing that not all employees could be accounted for right after the shooting. A charge leveled against Oswald to incriminate.

Some who were outside the building went home without indication that they spoke first with the police.

Carol Reed left for home at 1:45

S Sharon Nelson left at 12:20 to see the president and never returned after the shooting.

Joe Molina left at 2:15.

→ Do a FO check on him. He was a suspect

At least 5-6 others left at 2:00 and went home. Not clear whether they spoke with the police before leaving the scene.

Some tried to get back in the building but said the cops locked the front door. Others were allowed in.

From the statements it appears that there was confusion galore as would be expected.

Special interest in statements by Styles and Adams. And Carolyn Arnold and Givens.

There are these March statements by Lovelady and Shelly. Even at this late date when they had an opportunity to rehearse their stories their accounts still do not jive as to where Lovelady was at the time of the first shot.
