

9/10/68

Dear Jerry,

Yours is an informative letter. Can the windows the Texas delegation be used be identified? If anything was thrown on the gastaps, could it have been from these windows?

I'm going to show your letter to several correspondent friend who will, I think, find it informative.

Your commentary on society is correct. I disagree on your cart and horse placement. I think all really stems from the assassination rather than the other way around. I think this was the purpose of the JFK assassination, and of those that followed.

Good for Andy!

My "Coup d'etat" should hold great interest for black people and groups, but they are more catholic than the pope and I doubt if any will ever look at it. It ties the most extreme of the extremists of the right with all the assassinations plus the bombing of the Birmingham church.

Not by inductive reasoning but with suppressed documents. It is official, solid, very frightening, and its prospects are slim, I regret to say. Several who have read it, including Vince, who you know and several you do not, agree it is new, important, interesting, etc.

I could make the same comment about Jews as about Negroes. They also, repeating the history of the 60s, will not interest themselves. Yet this same group, the so-called "National States Rights Party", is even more anti-Semitic than anti-Negro.

The German parallels are startling. Perhaps those with the same origins as the eminences of the Judenrat can better understand why and how the members of the Commission did as they did.

Sincerely
