MARK/LANE 178 Spring Street New York, N.Y. 10012

June 8, 1966.

Mr. James J. Rowley, Director United States Recret Service U. S. Ireasury Washington, D. C.

Dear Sir:

As you may know I am a researcher duly registered with the National Archives and Records Service and a holder of researcher identification card number 604-145. I have, in addition, an account with that office which has permitted me in the past to order photostatic copies of documents in their records.

I have exemined a number of the documents on the list of basic source materials in possession of the Marten Commission maintained by the Mational Archives. I am now anxious to examine some of the physical evidence in the case. I refer to the shirt and jacket worm by President Mennedy on Movember 22, 1963, the bullet designated by the Marren Commission as Commission Exhibit 399, as well as the two fragments of bullets also found, the alleged assassination rifle, the jacket which the Commission determined that we Harvey Oswald wore on November 22, Oswald's handwriting specimens that were examined by the Commission's experts, the pistol that the Commission determined was used to shoot J. D. Tippit, the bullets recovered from Tippit's body, the goatskin that served as a target for bullets fired from the alleged assassination weapon, the metal shims that were attached to the alleged assassination weapon before it was tested, the windshield of the Presidential limousine, the original photograph shown to Marguerite Oswald on Nov-

ember 23, 1963 by FBI Agent Gdum, the curbstone that was damaged on hovember 21nd and examined at the FBI Laboratory during August, 1964, the paper bag in which Eswald allegedly carried the rifle on Movember 22 and the paper bag manufactured by the FBI Laboratory to simulate the original, and the actual tape-recordings of the Ballas Police broadcasts unich were examined by an FBI agent and from which two different and inconsistent transcripts were made and published by the Commission.

In some cases I would wish to have reputable and recognized authorities make the examination on my behalf. For example, I wish to employ outstanding handwriting experts to examine the handwriting specimens. I have absolutely no objection to examining the evidence under the supervision of government agents.

If some of the evidence that I have referred to hereinabove is in the possession of the Secret Service, I should like to know when it may be convenient for your office for me to see the evidence and arrange to have independent experts examine the evidence.

If for any reason you should decline to permit an examination of the evidence by me or by independent experts, I would appreciate it if you would in any event list those items of evidence that you actually do possess and the authorities upon which you rely both for the possession of the evidence and the declination to permit the examination of the evidence.

Sincerely,

Mark Lane

MARK LANE 178 Spring Street New York, N. Y. 10012

June &, 1966.

Hr. J. Edgar Hoover, Director Federal Bureau of Investigation Department of Justice Washington, D. C.

Dear Sir:

As you may know I am a researcher duly registered with the National Archives and Records Service and a holder of researcher identification card number 604-145. I have, in addition, an account with that office which has permitted me in the past to order photostatic copies of decuments in their records.

I have examined a number of the documents on the list of basic source materials in possession of the Warren Commission maintained by the National Archives. I am now anxious to examine some of the physical evidence in the case. I refer to the shirt and jacket worn by President Kennedy on Rovember 22, 1963, the bullet designated by the Warren Commission as Commission Exhibit 399, as well as the two fragments of bullets also found, the alleged assassination rifle, the jacket which the Commission determined that Lee Harvey Oswald wore on l'ovember 22, Oswald's handwriting specimens that were examined by the Commission's experts, the pistol that the Commission determined was used to shoot J. D. Tippit, the bullets recovered from Tippit's body, the postskin that served as a target for bullets fired from the alleged assassination weapon, the metal shins that were attached to the alleged assass;

limousine, the original photograph shown to Harrucrite Oswald on Nov-

Movember 22nd and examined at the FBI laborator; during the paper bag in which Canald allegedly carried the rifl 22 and the paper bag manufactured by the FBI Laboratory the original, and the actual tape-recordings of the Dall broadcasts which were examined by an FBI agent and from ferent and inconsistent transcripts were made and public Commission.

I have absolutely no objection to examining the evidenc supervision of governmental agents. In some cases I wo have reputable and recognized authorities make the examination for example, I wish to employ outstanding handwrexamine the handwriting specimens.

I have been informed that at least some, if not most or evidence that I have referred to hereinabove, may be in of the FRI. Accordingly I should like to know when it ent for your office for me to see the evidence and arradependent experts examine the evidence.

If for any reason you should decline to permit an exame evidence by me or by independent experts, I would approve you would in any event list those items of evidence the do possess and the authorities upon which you rely botton of the evidence and the declination to permit the the evidence.

Sincerely,

Mark Lane
