

Notes for Autopsy Chapter

This is a list of things that could be added to a revised version of paper prepared for JFK autopsy article. I think I could use this paper and expand with new material into a chapter on the autopsy.

Additions would include the following:

@ Specter's gandy dance with the media coverage of the Perry/Kemp news conference. I am waiting for CD from Archives that notes the Commission had record of media coverage of this. Specter before Perry appeared before WC already preparing to Get these transcripts.

@ Connally's clothes

@ Develop the fallacy of the single-bullet theory. Check on Humes, Boswell, and Finck's March testimony where they all reject the possibility that #399 could have done that damage to Connally's wrist and remained pristine.

@ Specter's lying about #399 found on Connally's stretcher. See Tomlinson and SS agent Johnson's report. *Also Mr. Chevi's possession*

@ Expand more on the meaning of the FBI not asking for copy of autopsy.

@ Tague bullet/Tague affidavit?

@ Boswell's dismissal of FBI, SS, and Burkley's observations on the neck wound. See his ARRB deposition.

@ Dolci's views; his boycotting as a WC witness.

@ Connally's testimony on the shooting; its impact on Russell. Russell's dissent mention or developed here.
