

Hall

file w CIA

This leads into his version of what happened when Oswald went to Mexico. That is next, in his chapter that carries this penny-dreadful thing of his forward in his mind and that of the unquestioning reviewers who never checked anything at all out.

Not even what is so obvious. Like how was there going to be any "coverage of Oswald in Mexico" that could be attributed to the FBI fighting with the CIA when the CIA in Mexico began by not sending any word on Oswald's being there until a week after he was no longer there to be "covered" there?

His infallible CIA did not send any word about Oswald having been there until October 9, which was after Oswald was back in Dallas, and then they sent the wrong name, "Lee Henry Oswald." Which by some kind of magic just happens to be the precise wrong way that three years earlier the CIA opened its Personality Profile file on Oswald, with that particular version of the wrong name.

Notes

Interesting, isn't it, that in Mexico City those spooks came up with the exact error, of all the male middle names beginning with "H", that the headquarters records used? (That the CIA's Oswald 201 file, Personality Profile, has this mistake in it is disclosed by the CIA's own records, including the one with which the creation of that file was requested, a copy of which Anna Marie Kuhns-Walko sent me. Later the CIA corrected this, someone adding to the "Personality (201) File Request," after encircling "Henry" this correction: "NB: HARVEY." The initials of the person making the correction seem to be PGR. The date was April 30, 1975. Yes, it took 15 years to make the correction, 12 years after the assassination. On this form the entry under "Action Desk" was "CI/SIG." Under "2nd Country Interest" was "SR" but that also is lined through. This copy is "CS Copy." And it is the 201 File Number that leaves it absolutely certain that Lee Henry Oswald is really Lee Harvey Oswald. That number is 289248.

file as Oswald's

It also should be noted that this request for establishing the Personality Profile file was not made until more than a year after Oswald's pretended defection. Not only does this make no sense - Anna Marie told me that there are indications of another or other Oswald Personality Profile files. John Newman, whose book *Oswald and the CIA* is due to be published in March, 1995, told me in late 1993 that he found records of three early expressions of CIA interest in Oswald all before any Personality
