Dallas--Thirty Years Later.

Think piece on JFK assassination as we approach three decades(title). What do we know and what can we expect.

Date--since 1967. How much has been added?

See CRS report on public and the official story. Stats will show that WC has not acquired more credibility over the years.

Oliver Stone impact. What is in the files? Stone raised this issue. Discuss what files are out. Any smoking gun. Realistically, no. After thirty years the trail has grown cold. Never know who killed JFK. Can get in touch w/ our history by official recognition that WC is a fable.

WC files. About 90% of all this material in the public domain. What might be gleaned from the other files. That FBI, SS, CIA. . .all the pertinent agencies never believed the single-bullet theory. They all believed in a conspiracy in Dallas. Was LHO a low-level US intelligence sort at one time?

Gates and the new glasnost. See Bush directive. Give a short account of Gates and the great unweaving. Case of the frivolous nature of our politics certainly as it centers on this question.

Source/ formatting help--see Hanchett article and the xeroxes on the Lincoln assassination in H. 225 file.
