

INVENTORIES - received 7/12/80

The FBI TT to all SACs is Serial 3976 in ^{Hq} ~~the~~ 100-106670. It is not the same as the one Cole provided. It is copied so far off-center that if there are notes of duplicate filings, as there should be, they are eliminated in the xeroxing.

It is marked as declassified 6/24/80. This is almost two years after Shea notified me it was to be reviewed for disclosure to me. It also is a date that indicates it could have reached me in less than 18 days.

(The first record is the worksheets. This is the second. This copy has the 12/4/75 Pottinger to Hoover letter referred to as attached. Cole withheld that. The apparent reason is obvious; non-compliance by other Departmental components.)

12/4/75. Pottinger to Hoover. DJ 144-72-668.

It opens with the statement that the AG "has instructed this Division and the Criminal Division to look at all actions taken by the Federal Bureau of Investigation with respect to Martin Luther ^King, Jr. ..." He then itemizes the matters to be looked at. The fourth is "Your complete file on the investigation of the assassination of Dr. King, including internal and administrative Bureau memoranda." (Emphasis added.)

Criminal Division has not provided any relevant records. It is included in the request, Item 17, for "All notes, memoranda, correspondence or investigative reports constituting or pertaining to any re-investigation or attempted re-investigation of the assassination of Dr. King undertaken in 1969 or any time thereafter, and all documents setting forth the reasons or guidelines for any such re-investigation."

(We have a total of but eight records provided by Criminal. Six are of 1968 and one in each of the next two years. *20 other Criminal records are CRD referrals, 1 x duplicate.*)

The request of the FBI includes FBIHQ. No such inventory is in the FBIHQ MURKIN file. Either the FBI did not provide it or it filed it elsewhere.

If these inventories were provided to CRD and/or Criminal, they have neither provided copies nor accounted for them and claimed any exemption. (Pottinger also says they want to review "every single item," which adds emphasis.)

The next record is the FBI's response of 12/8/75. CRD did not provide this.

It also is initialed SFP, Phillips. It includes reference to "The FBI's investigation of the assassination of King."

Washington - WFO (filed 100-40164 -airtel

* not explained

Begins by saying that "The following survey conducted by WFO consists only of main files maintained by this office as identified in WFO general indices, pertaining to those individuals, organizations and titles set forth" in HQ directive. It then says that "In view of the above circumscribed delineations of the survey, some main files of this office, such as those dealing with demonstrations sponsored by the Southern Christian Leadership Conference (SCLC) in which captioned individual was a primary participant, were not located in this general indices search. Likewise, no Elsur material was located in this general indices main file search, however, this would not preclude such material being located ~~as~~ in a subsequent ~~and~~ general and special indices search for references."

In short, they have what they are not reporting, another search not limited to main files only would disclose it, and they are taking the directive literally rather than as meaning, "tell us all that you have."

Its filing procedures follow.

Note that some investigations are attributed to "auxiliary office, but the initials WF do not mean this because they are prefixed to all files cited. Washington, D.C, is a single city of relatively small area, so the subdivision into an auxiliary office

cannot be as with other satellite offices, if that it is, because of distance from the field office. *Is Auxiliary office represented by WFA?*
