9/29/'97

Dear Ms. Oliver:

I am interested in finding any information about Dr. Joseph Dolce who was a consultant to the Biophysics Division of Edgewood Arsenal at the time of the President Kennedy assassination. In his capacity Dolce was requested by the Warren Commission to run tests on the Lee Harvey Oswald rifle that was allegedly used in the assassination.

Is there a subject file or a "Known Persons" (KP) file created by the Warren Commission on Dr. Dolce?

If the National Archives has such a file or files could you let me know how many pages are involved?

Secondly, I have a manuscript in preparation on the Warren Commission and expect to visit the Archives to look over the newly acquired J. Lee Rankin Papers. In order to get some idea of how much time I might need to go over these 40,000 pages could you tell me whether Rankin's papers are arranged in some chronological order that would allow me to research specific times, such as January 1964 or September 1964?

Thank you,

Jerry McKnight
